 Ordovician

Structural section (F-G-H-I, Pl. XXI) from Tuscola to Vermillion County, Indiana. The logs are approximately adjusted to the line of the section. Undetected local structures may change locally the bedding lines shown. The dips between logs Nos. 11 and 12 may be in error on that account. Reference to the axes of folding shown on Plate XXI should be made while using this cross section. (A set of all the detailed logs to which reference is made in this report is available for examination upon request to the Chief, State Geological Survey, Urbana, Illinois.)
