|-----------------------------|------------------------|
| 1 Crawford County composite | 11 Detailed log No. 71 |
| 2 Bellair pool composite | 12 Detailed log No. 55 |
| 3 Johnson pool composite | 13 Detailed log No. 53 |
| 4 Casey pool composite | 14 Detailed log No. 58 |
| 5 Siggins pool composite | 15 Detailed log No. 52 |
| 6 Parker pool composite | 16 Detailed log No. 49 |
| 7 Detailed log No. 92 | 17 Detailed log No. 32 |
| 8 Detailed log No. 82 | 18 Detailed log No. 23 |
| 9 Detailed log No. 63 | 19 Detailed log No. 3 |
| 10 Detailed log No. 67 | |

Note: Logs Nos. 1 to 6 inclusive are composites made up from study of many logs from each of the areas represented. The small italicized numbers opposite the coal horizons in these composite logs state the number of logs that recorded coal at these horizons. Coal thicknesses are not drawn to scale, but have been exaggerated. Exact accuracy of correlation is not intended. Errors of 25± feet may be expected.

North-south stratigraphic section showing No. 6 coal correlation from Crawford to Vermilion County. (A set of all the detailed logs to which reference is made in this report is available for examination upon request to the Chief, State Geological Survey, Urbana, Illinois.)
