

KEY

- Pennsylvania boundary
- Approximate coal outcrop
- Overburden thickness
- Local mines, area depleted unknown
- Coal exposure
- Mined out by stripping
- Boundaries between thickness or reliability categories
- Average thickness of coal (inches) Class I, primary reserves
- Average thickness of coal (inches) Class II, secondary reserves
- Coal less than 18 inches thick
- No coal thickness data
- Structure contour on top of Colchester (No. 2) Coal, interval 25 feet

SCALE

STRIPPABLE COAL RESERVES OF ILLINOIS, PART 4  
COLCHESTER (NO. 2) COAL

ADAMS, BROWN, CALHOUN, HANCOCK, MCDONOUGH, PIKE, SCHUYLER,  
AND THE SOUTHERN PARTS OF HENDERSON AND WARREN COUNTIES
