

DRIFT THICKNESS OF KANE COUNTY

ANNE L. ERDMANN

developed from Vaiden and Curry
(1990) and U.S. Geological Survey
topographic base maps

DRIFT THICKNESS

	Not present		200-250 feet
	0-50 feet		250-300 feet
	50-100 feet		300-350 feet
	100-150 feet		> 350 feet
	150-200 feet		

— 50 — Thickness of glacial deposits

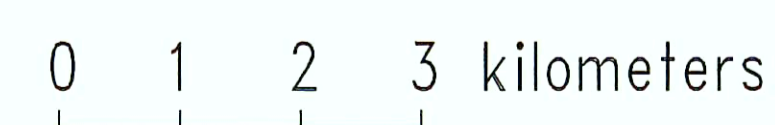

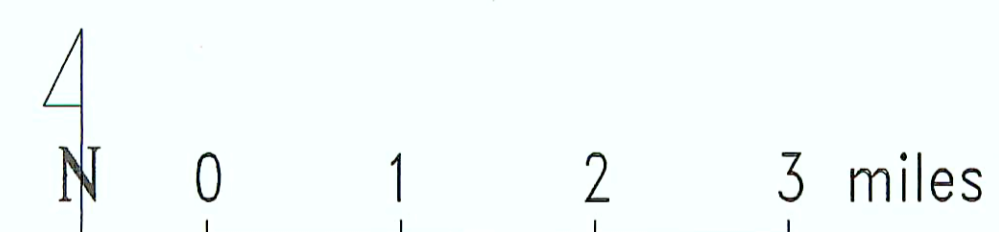

Contour interval 50 feet

PITS AND QUARRIES

x	small pits and quarries
	pits and quarries

CULTURAL FEATURES

	Roads
	Municipal boundaries
	Township boundaries

Lambert conformal conic projection
based on standard parallels 33 and 45.

Scale 1:62,500

This map was generated using the TIN module of the ARC/INFO software package from bedrock topography maps digitized at 1:62,500 and surface topography maps digitized at 1:24,000. These data are on file at the Illinois State Geological Survey as of June 1989. Locations of some features may be offset by 500 feet or more due to errors in the source maps, the contour generation process, digitizing, or a combination of these factors. The Illinois State Geological Survey does not guarantee the validity or accuracy of these data.
